Professional Summary

Detail-oriented analyst with a strong background in business analytics, operations, and ERP data management. Experienced in inventory management, purchasing, logistics, and supplier coordination in dynamic environments. Proven ability to apply data-driven analysis, monitor budgets and performance metrics, and optimize operational workflows. Currently pursuing a master's degree in data science and analytics, with academic training in data analysis, validation, and reporting. Known for my adaptability, strong work ethic, and commitment to continuous learning, with conversational proficiency in Spanish

Technical Skills

- Data analysis: Excel (Pivot Tables, VLOOKUP), reporting, data validation
- Programming: Python (data analysis fundamentals)
- Systems: ERP (e-automate), Crystal Reports, CEO Juice
- Methods: Process improvement, KPI tracking, operational reporting
- Microsoft Excel (Advanced)
- Data Visualization
- Statistical Analysis

Professional Experience

Parts Specialist
Cobb Technologies – Virginia
2018–2021 | 2025 – Present

- Analyzed parts inventory datasets to maintain accurate stock levels, identify usage trends, and support demand planning
- Collaborated with cross-functional teams to prioritize and expedite special orders using data-driven insights
- Tracked and analyzed vendor ETA and part availability data to support accurate reporting and operational decision-making
- Analyzed parts backorder, transfer, return, and advanced exchange data to identify discrepancies and improve operational accuracy
- Generated, reviewed, and validated automated reports using Crystal Reports and CEO Juice, ensuring consistency and reliability
- Ensured ERP data integrity by reconciling technician-to-technician parts transfers

Supplies Specialist
Cobb Technologies – Virginia
2023-2025

- Analyzed order fulfillment and logistics datasets to maintain 100% on-time delivery performance, identifying risks and performance gaps
- Monitored, validated, and maintained inventory datasets across multiple categories to support operational reporting and planning
- Analyzed drop-shipment and backorder trends to identify fulfillment issues and support corrective action planning
- Evaluated supplier performance using KPIs such as lead time, fill rate, and order accuracy to support vendor optimization
- Investigated shipment anomalies by analyzing carrier performance data (FedEx and others) to resolve loss, damage, and delivery discrepancies
- Applied time-sensitive demand and lead-time analysis to prioritize and expedite critical supplier shipments

Supplies and Logistics Manager
Little Scholars LLC - Virginia
2021-2023

- Analyzed project timelines, deliverables, and resource data to support the successful execution of multiple projects within defined schedules
- Coordinated internal and external stakeholders using performance and status data to ensure on-time delivery of project milestones
- Allocated and optimized resources by analyzing scope, cost, and performance metrics to support data-driven decision-making
- Created and maintained standardized documentation and datasets for procurement and logistics workflows to improve reporting consistency
- Monitored project budget data to ensure fiscal compliance, cost control, and variance tracking
- Tracked team performance metrics and operational KPIs to align execution with company standards
- Identified cost drivers through shipping and logistics data analysis, achieving a 24% reduction in shipping costs

Equipment Expediter
Cobb Technologies – Virginia
2015 – 2018

- Tracked and submitted part warranty data to vendors, ensuring accurate documentation and issue resolution
- Updated and validated equipment and lease records in the ERP system to maintain data accuracy and reporting integrity
- Coordinated transportation and vendor return activities while tracking related logistics data for operational visibility

Education and Certificates

- Master's of Science in Data Science and Analytics *(In Progress) /* Old Dominion University
- Data Analytics Certificate / Harvard Extension School
- Bachelor's of Science in Business Administration with a Concentration in Economics / Longwood University
